

## Foliar Yield Enhancements

*E.J. Dunphy and R.W. Heiniger,*

*Crop Science Department*

*N.C. State University*

There are many products on the market said to increase soybean yields and profits. This project tested the efficacy of several foliar treatments in improving yields of soybeans in Bertie, Hertford, Pasquotank and Union/Stanly counties. Results of this project showed that five of seven foliar fungicides and two of the other foliar treatments, improved yields by 2 Bu/A or more. The treatments are also being tested in 2014 to see if the results remain consistent.

## Foliar Potential Yield Enhancements

On-Farm Test North Carolina, 2013

Treatment Avg.	Bu/A	Treatment Avg.	Bu/A
Headline	40.9	Sugar 2 lb/100 @ 3-4 Tri	38.7
Quadris	40.1	Nutran 3 - 4 Tri w/sugar	38.6
Domark	38.1	Nutran 3- 4 Tri no sugar	37.3
Top Guard	41.1	Nutran w/sugar + 25 days	38.0
Stratego Yld	39.8	Nutran no sugar + 25 days	37.4
Quadris Top	42.8	Nutran both times w/sugar	39.2
Priaxor	43.1	Nutran both no sugar	38.2
Bio-Forge R2 w/ sugar	37.8	Photon @ 3-4 Tri & R2	38.9
Bio-Forge R2 no sugar	39.4	Soar I Series Trts	41.3
		Soar II Series Trts	41.0
Check	38.2
